

Alignment Guide - Altro Wood™ Collection

The Altro Wood Collection is manufactured with a directional pattern. We recommend that the material is laid from sheet to sheet with a random pattern match and that cross joints should be avoided where possible.

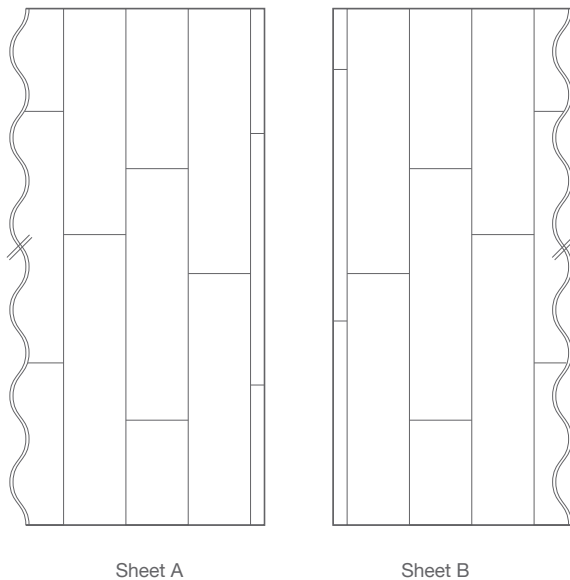

Diagram 1 – Ensure that both sheets are laid out in the same direction.

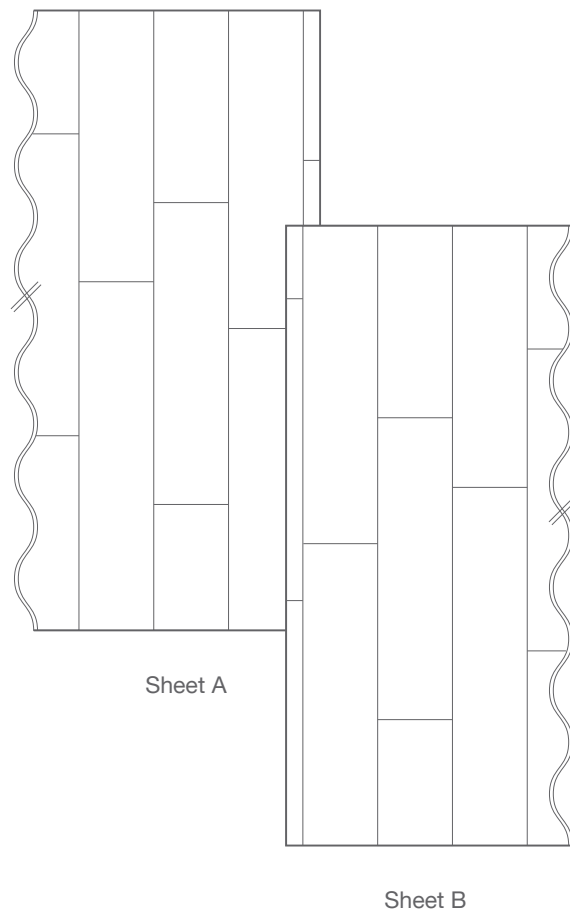

Diagram 2 – Both edges of the sheet have a narrow edge which needs to be trimmed to leave a full plank. Overlap sheet A over sheet B as indicated above and cut in the joint, cutting both sheets so that the join runs down the edge of the planks.
